# Sample Slides

Our Product Vision is that we hope to allow all of our users to find a job more quickly and efficiently.

JobFinder

Name:
John

Job you are applying for:
Fry Cook    Submit

# Product Overview
## *The problem it addresses*

- Finding a Job Requires a Plan
- You're Not Finding the Right Opportunities
- You Haven't Been Called in for an Interview
- You're Not Receiving Offers

# Who is your audience?

- Our target customers are recent college graduates.
- Those that might be graduating soon and need to find employment.

| Title: Job Finder | |
| --- | --- |

## User story

**As a** job seeker,

**I want to** search for a job

**so that I can** advance my career.

## Acceptance criteria

**Given that** I graduate,

**when** right out of college

**then** I should be able to get a job.

# The System Model

# Customer/Partner Team Feedback

- Discuss whatever feedback your customer shared with you:
  - how well does it meet their needs (their needs were met and they were pleased)
  - future enhancements they'd like to see (they would like to see further features implemented regarding employer outreach)
  - Overall, they thought it was very user friendly and beneficial

# Additional enhancements - additional enhancements that could be made?

- Future enhancements
  - Optionally list employers that are actively working with temp agencies
  - Option to only list roles over a certain salary threshold
  - Allow user to enter nearest intersection of highway milepost marker and provide a list of the ten closest stations ordered by gas price

# Major Challenges/ lessons learned

- Find a reliable source of info
- Code the graphs to fit info
- Organize meeting times
- We learned that user feedback is very useful to creating a good product
- Learned that team work makes the dream work
